WHAT DO YOU CALL A CONVICTION
THAT EVERYTHING CAN ALWAYS BE
A LITTLE BETTER, EASIER AND MORE
RELIABLE?

WE CALL IT
Upgrade Dentistry

With expertise and enthusiasm, COLTENE turned this claim into reality. We know exactly our end customers needs and want and work tirelessly to provide them with innovative and smart solutions.

This is not an empty promise, it is our mission. Upgrading Dentistry makes dental treatments more effective, safe and economical for dental professionals and patients.

Better Quality. Better Reliability. Better Practise.

ISOLATION AND FIXATION

Dental Dam

Upgrade your isolation

COLTENE

Selection Guidelines

Dental Dam
The variety of dam materials means that the specific requirements of each clinical situation and treatment procedure are not necessarily met effectively. It is essential to choose the dam material that best suits the clinical situation and the treatment procedure to be performed. The dental dam must be suitable for the clinical situation and the treatment procedure to be performed.

Recommendations

- RETRACTOR**
 - Choose the dental dam. Thicker dam material for retraction.
 - Choose a retractor-free dental dam to reduce the risk of gagging and discomfort.
 - Choose a retractor-free dental dam with low retention force to reduce the risk of gagging and discomfort.
- ALLERGIES**
 - Choose a retractor-free dental dam to reduce the risk of gagging and discomfort.
 - Choose a retractor-free dental dam with low retention force to reduce the risk of gagging and discomfort.
- RESISTANCE**
 - Choose a retractor-free dental dam as it offers the highest resistance to control of foreign substances.
- COLOR OPTIONS**
 - Use the technology and evaluation to the advantage of light and precision control by a dentist.
 - Choose a retractor-free dental dam to reduce the risk of gagging and discomfort.
- SIZE AND APPLICATION AIDS**
 - Choose 127 x 127 mm dental dam for smaller patients.
 - Choose Flexi Dam with built-in handles for the dentist on the patient.
- GENERAL RECOMMENDATIONS**
 - Call on the dental dam sheet on the website to see the performance of the dam material.
 - Call on the dental dam sheet on the website to see the performance of the dam material.

Upgrade your isolation

Our variety of dam materials ensure that the specific requirements of each clinical situation and treatment procedure are successfully and effectively met. Elasticity, the ability to retract, thickness, color and non-allergenic are relevant features to consider when choosing the most appropriate material.

Upgrade your fixation

Dental dam fit partly depends on how it is secured to the teeth. COLTENE makes fixation simple with both Wingless and Winged clamps. Winged clamps have projections at the jaws while wingless do not. Our aim is to accommodate application techniques with

any dentist's style. Our dental dam clamps are manufactured from high quality stainless steel for greater durability.

Etch & Bond

SPOTLIGHT

ONE COAT 7 UNIVERSAL

13

ONE COAT 7 UNIVERSAL is a universal, light-cured, one-component bonding agent able to be used with self-etch, selective etch or total etch technique for adhesive restorations.

Etchant Gel S

7373

35 % phosphoric acid etching gel with precise placement, usable for enamel and dentin.

REF	Item
7373	Kit 2 x 2.5 ml Etchant Gel S 1 x 20 pcs Application needles

REF	Accessories
7876	Application Needles Black, 20 pcs

One Coat

Dentists from all over the world rely for years on the proven One Coat adhesives of COLTENE. The light-curing bonding systems provide adhesion to various surfaces and distinguish with outstanding adhesion values and excellent marginal integrity.

ONE COAT 7 UNIVERSAL

60019538

60019540

ONE COAT 7 UNIVERSAL is a universal, light-curing, one-component bonding agent for adhesive restoration technique, applicable in self-etch, selective-etch or total-etch technique.

Optionally, ONE COAT 7 UNIVERSAL can also be used with One Coat 7.0 Activator for chemically curing materials.

- Universal bonding to dentin, enamel, ceramics, zirconia, metals and composite
- Excellent and reliable bond strength no matter which etching technique used
- Great marginal sealing for long term stability
- User-friendly handling
- Antibacterial (Proliferation test for antimicrobial activity with *S.epidermidis* by QualityLabs, Germany)

REF	Item
60019538	Intro Kit
	1 × 5 ml ONE COAT 7 UNIVERSAL
	1 × 2.5 ml Etchant Gel S
	1 × 50 pcs Microbrush, black
	1 × 20 pcs Application needles

One Coat 7.0 Activator

7054

One Coat 7.0 Activator is an activator to provide the use with chemically and dual cured materials. One Coat 7.0 Activator is used exclusively in combination with ONE COAT 7 UNIVERSAL.

REF	Item
7054	Activator Kit
	1 × 3 ml One Coat 7.0 Activator
	1 × 50 pcs Microbrush, black

One Coat Bond

60011757

7879

Total-Etch light curing dentin/enamel bonding system for universal indications, prevents postoperative sensitivity.

- Gel-like consistency - does not slump or drip for safe application
- Solvent free - no evaporation, no drying out
- Super concentrated - in average 100 drops per syringe

REF	Item
60011757	Intro Kit 1 × 1.2 ml One Coat Bond 1 × 2.5 ml Etchant Gel S 1 × 50 pcs Microbrush, black 1 × 20 pcs Application needles

7879	Refill, 1 × 1.2 ml

REF	Accessories
7634	Microbrushes Black, 50 pcs

ParaBond®

7486

Chemically cured, self-conditioning adhesive system for enamel and dentin which consists of a non-rinse conditioner and a chemically curing adhesive (adhesives A and B).

- Seals the tooth surface and minimizes the risk of postoperative sensitivities
- Ideal for situations where light might not penetrate, such as for post cementation, metal crowns, deep cavities or opaque ceramic
- High shear bond strengths on dentin and enamel
- Universally applicable with chemically-, dual- and light-curing materials

REF	Item
7486	Kit 1 × 3 ml ParaBond Non-Rinse Conditioner 1 × 3 ml ParaBond Adhesive A 1 × 3 ml ParaBond Adhesive B
7493	Adhesive Refill A&B 1 × 3 ml ParaBond Adhesive A 1 × 3 ml ParaBond Adhesive B
7494	Non-Rinse Conditioner Refill, 1 × 3 ml

A.R.T. Bond

7362

Classical light curing dentin/enamel bonding system for universal indications, high bond strength, withstands the test of time, scientifically recommended.

- Secure Bonding: protects from postoperative sensitivity
- Perfect marginal seal due to rapid initial bond strength in seconds
- Produces reliable biomechanical bridge between enamel, dentin and composite
- Universal application

REF	Item
7362	Kit
	1 × 5 ml A.R.T BOND Primer A

Conventional Composites

SPOTLIGHT

BRILLIANT EverGlow®

20

BRILLIANT EverGlow is the latest composite line of COLTENE. Developed to provide an ideal mixture of high, long-lasting gloss and shade aesthetics, handling convenience and durability, it is a true all-round material. BRILLIANT EverGlow complies with the VITA based duo shade system and is available in 3 opaque, 7 universal and 2 translucent shades as well as in a flowable consistency.

SYNERGY® D6

24

SYNERGY D6 is a nano-hybrid composite for everyday dentistry. The simple selection of shades is a special feature. SYNERGY D6 complies with the duo shade system. The product line is available in two consistencies.

MIRIS²

Artificial Reality

MIRIS2 offers a unique shade system on the basis of the natural layering concept, which works with dentin and enamel masses whose optical properties are comparable with those of the original tissue. For this purpose, the shades and translucency of natural teeth in adolescent, adult and elderly patients were measured and emulated. For achieving an aesthetically optimal definition of shade, the MIRIS2 Shade Guide is separated into composite-based dentin cores and enamel shells that can be freely interposed on one another.

In addition to dentin and enamel shades, special effects shades complete the system to allow customised restorations, taking individual aspects into account, and thus achieve unsurpassed aesthetics - even in highly complex cases.

BRILLIANT EverGlow®

Enduring gloss – made brilliant

With BRILLIANT EverGlow highly aesthetic and long-lasting restorations can be achieved effortlessly.

- Exceptional polishability and long-lasting brilliance
- Aesthetic single-shade restorations
- Versatile shade system with three translucency levels
- Excellent sculptability and smooth consistency
- Good wettability with minimal stickiness to the instrument

BRILLIANT EverGlow Kits

The universal submicron hybrid composite BRILLIANT EverGlow excels through convenient sculptability and form stability, excellent polishability and a long-lasting high lustre. Its sophisticated shade system offers three translucency levels and enhanced Duo Shades that allow for a flexible use for single-shade and multi-shade layered restorations.

BRILLIANT EverGlow Flow Kits

BRILLIANT EverGlow Flow is based on the same filler technology as BRILLIANT EverGlow and is therefore the perfect complement. Thanks to its well-adjusted thixotropy, BRILLIANT EverGlow Flow has a low viscosity yet offers high stability. A new, extra thin application needle extends the range of accessories and allows for highest application precision.

Bulk-Fill Composite

SPOTLIGHT

Fill-Up!

30

Fill-Up! is a dual curing, medium viscous bulk composite for posterior Class I and II restorations. Owing to its dual curing property, fillings with Fill-Up! can be administered in arbitrary filling depth in a single step! An additional covering layer can optionally be applied to enhance aesthetics but is not necessary.

Fill-Up!

60019342

60019355

Welcome on the safe side!

Fill-Up! is a dual curing, medium viscous bulk composite for posterior Class I and II restorations. Owing to its dual curing property, fillings with Fill-Up! can be administered in arbitrary filling depth in a single step! An additional covering layer can optionally be applied to enhance aesthetics but is not necessary.

Conventional light curing bulk filling materials are limited in their curing depth, putting into question whether the restoration fully cures. On the contrary, the dual curing property of Fill-Up! guarantees a thorough curing down to the bottom of every cavity. Moreover, chemical curing minimises shrinkage stress dramatically, preventing microfractures and postoperative sensitivities. As supported by study, the bonding partners ParaBond and ONE COAT 7 UNIVERSAL (together with the activator) cater for a perfect marginal seal comparable to the one of conventional composite - before and after thermocycling and chewing abrasion – ensuring a secure long-term restorative solution.

Fill-Up! is your perfect choice for all Class I and II fillings, cavity lining and core build-ups – every time when a fast restoration is needed or for cavities difficult to reach with the curing light.

- Unlimited depth polymerisation due to dual curing system
- Guaranteed single-layer technique, top layer optional but not necessary
- Minimal shrinkage stress with chemical curing
- Optimal marginal sealing with the matched ParaBond or ONE COAT 7 UNIVERSAL bonding systems
- Convenient automix application

CAD/CAM Solutions

SPOTLIGHT

BRILLIANT Crios

34

Composite has long been the gold standard in direct filling therapy. With BRILLIANT Crios, the well-proven dental material entered the indirect CAD/CAM restoration technology. Compared to ceramics, CAD/CAM composites offer considerable advantages.

BRILLIANT Crios

BRILLIANT Crios is a reinforced composite. The material combines all the advantages of an innovative submicron hybrid composite material with those of a CAD/CAM fabrication process for reliable, aesthetic and fast restorations without a separate firing process. Consistently controlled fabrication with constant thermal curing, gives the reinforced composite excellent mechanical properties. Two sizes and two translucencies with 13 shades offer a broad range for a daily use in the dental practice.

- Tooth-like modulus of elasticity for a shock-absorbing effect and pleasant bite feeling
- High resistance and low abrasion on antagonist
- Exceptional grinding precision for more freedom of preparation
- Effortless polishing for fast gloss
- Blends in extremely well to give natural aesthetics

Composite Veneering System

SPOTLIGHT

BRILLIANT COMPONEER®

40

The BRILLIANT COMPONEER veneering system is comprised of prefabricated composite veneers for aesthetic anterior restorations in a single visit. The BRILLIANT COMPONEER shells are based on the innovative BRILLIANT EverGlow sub-micron filler technology, which results in exceptional polishability and long-lasting gloss retention. The composite veneers are extremely thin and allow a minimal-invasive treatment to open up new economic possibilities for both dentists and patients.

Direct Composite Veneering System - A smile made BRILLIANT!

The BRILLIANT COMPONEER veneering system is comprised of prefabricated composite veneers for anterior restoration. Due to the smooth consistency of BRILLIANT EverGlow and excellent shade matching with BRILLIANT COMPONEER, the system is intuitive and easy to use. As only one visit is necessary, the innovative Composite Veneering System BRILLIANT COMPONEER opens up new economic possibilities for both dentists and patients.

Luting Materials

SPOTLIGHT

SoloCem®

46

SoloCem is a self-adhesive resin cement that ensures reliable, tight restoration, in concert with a particularly low level of shrinkage. This dual-curing cement achieves outstanding adhesion values that guarantee durable stability on the enamel and dentin without bonding.

SoloCem® Kits

60013986

Self-adhesive dual curing resin cement

Secure cementing does not depend on the number of working steps. Self-adhesive SoloCem achieves reliable values - with no additional bonding. This is the result of monomers contained and the composite-like formulation. The convenient automix syringe and the ready-to-use mixing tips offer a simple and time-saving application of SoloCem.

- A true self-adhesive cement: Etching, bonding and cementation in one step
- Long-lasting cementation without requiring a separate adhesive
- Fast and easy handling
- Provides high bond strength on a variety of materials
- Unique combination of MDP & 4-META

Core Build-up

SPOTLIGHT

ParaCore®

50

ParaCore simplifies the post & core restorative technique with its ability to be used as a 3-in-1 material for post cementation, core build-ups and crown & bridge cementation. Using one material for cementation and core build-ups provides an optimal «monoblock bond interface» between dentin, post and crown.

ParaCore®

3 Indications – 1 Material

ParaCore simplifies the post & core restorative technique with its ability to be used as a 3-in-1 material for post cementation, core build-ups and crown & bridge cementation. Using one material for cementation and core build-ups provides an optimal «monoblock bond interface» between dentin, post and crown.

- One Material for 3 Key Indications (post cementation, core-build ups, crown & bridge cementation)
- Optimal monoblock bond interface between the dentin-post-crown
- Superior bond strength and durability
- Stable consistency

Temporary Materials

SPOTLIGHT

Coltosol® F

56

Eugenol-free material for temporary fillings. For over 40 years, Coltosol F proves its reliability on a daily basis by delivering satisfying results all over the world.

Cool Temp® NATURAL

57

Cool Temp NATURAL is a temporary crowns and bridge material based on bis-acryl composite.

Coltosol® F

5906

5930

Coltosol F is a zinc oxide / zinc sulphate-based eugenol-free filling material for temporary fillings and temporary root canal seals. Available in universal white.

- High marginal seal due to slight expansion
- Contains zinc oxide and fluoride
- Eugenol-free and radiopaque
- Self-curing under the action of saliva
- No mixing, easy to remove

REF	Item
5906	Single Pack Jar, 1 × 38 g
5911	Eco Pack Jar, 3 × 38 g
5930	Syringe, 5 × 8 g
50003797	Spindle for Syringe, 1 pcs

DuoTEMP®

5831

7090

Dual-curing temporary filling material for temporary fillings, temporary endodontic sealing and temporary fillings for inlay- and onlay preparations. The material is based on zinc oxide / zinc sulphate and is available in universal white.

- Dual-curing (light and saliva)
- High marginal seal due to slight expansion
- Contains zinc oxide and fluoride
- Eugenol-free and radiopaque
- Good retention, easy removal

REF	Item
5831	Single Pack Syringe, 1 × 5 g
7090	Eco Pack Syringe, 5 × 5 g

Cool Temp® NATURAL

Temporary crown and bridge material based on bis-acryl composite, available in automix cartridges and automix syringes.

- Low polymerisation temperature
- Three fluorescent shades
- Low shrinkage
- Excellent polishability
- Easy and fast processing time

Curing Lights

S.P.E.C.® 3

62

The S.P.E.C. 3 curing light defines performance without compromise. Chair time can be effectively reduced due to rapid and deep polymerization on various light cured materials.

Coltolux® LED

63

The Coltolux LED is a simple yet reliable LED curing light. The cordless and lightweight pen-style design offers good handling properties for the daily use in the practice.

S.P.E.C.® 3

60013942

S.P.E.C. 3 meets the highest demands of performance in the dental practice. The stable, light-weight aluminium handpiece and the 360° rotating light guide provide convenient handling. Three different curing modes provide performance without compromise, enabling variable use to meet the individual requirements of dentists. A high performance, interchangeable lithium polymer battery provides over 300 10s cures between recharges.

- Cures 2 mm deep in one second
- Ergonomic lightweight design
- Three distinct power modes

Coltolux® LED

The Coltolux LED combines a slim curing probe with high output in a cordless lightweight pen-style design. The Coltolux LED's heat sink technology reduces the amount of heat emission and eliminates the need for active cooling.

C7970

- Advanced reflector design minimizes light diffusion
- LED light output matches the absorption spectrum of Camphorquinone (CQ) Photoinitiators
- Audible signal every 10 seconds and automatic power saving sleep mode after 15 minutes of inactivity
- Hundreds of 10-second curing cycles with a fully charged battery
- High output LED for fast cures. Cures 2 mm in only 10 s

The background is a solid dark purple. Overlaid on this are several abstract, semi-transparent purple shapes. There is a large, light purple semi-circle on the left side. A darker purple semi-circle is nested inside it, also on the left. On the right side, there is a light purple diamond shape pointing downwards. Below the diamond, there is a light purple shape that looks like a wide, shallow 'V' or a semi-circle opening to the right. In the bottom left corner, the number '10' is written in a large, white, sans-serif font. To its right, the text 'Parapulpal Pins' is written in a smaller, white, sans-serif font.

10 Parapulpal Pins

SPOTLIGHT

MAX® Pin

66

MAX Pins have been specifically designed to significantly reduce the stresses on the tooth associated with pin insertion and function. Yet, at the same time, retention of the restoration is optimized. MAX Pin is a complete redesign of pin technology – for safer, predictable restorative dentistry.

TMS

66

TMS pins are easy to use, self-threading retention pins. The well thought out construction of TMS, TMS LINK and TMS LINK PLUS is the result of decades of experience and an uncompromising effort to meet restorative needs.

MAX® Pin

Self-threading parapulpal retention pins with shoulder stop and rounded head design for good adaptation. Corrosion-free, titanium alloy. Self-alignment during placement.

Material	Color code	Ø mm	Pin Design	Sales Unit	Self-shearing	REF	Content
Titanium Alloy	Blue	0.425	Single	Complete-Kit	Yes	M61	25 Pins, 2 MAX Drills, 1 Hand Driver

TMS

For permanent retention in the most demanding indications

TMS pins are easy to use, self-threading retention pins. The well thought out construction of TMS, TMS LINK and TMS LINK PLUS is the result of decades of experience and an uncompromising effort to meet restorative needs.

TMS LINK PLUS®

TMS LINK PLUS pins offer smooth self-alignment, tapered pin end, shoulder stop and automatic shear-points. They are available as single pins or as convenient 2-in-1 pin system for a time saving placement. The pins can be mechanically installed.

Material	Color code	Ø mm	Pin Design	Sales Unit	Self-shearing	REF	Content
