Euronda

It's all about protection

Founded in 1975, Euronda is now an Italian company with a global outlook, synonymous with outstanding protection in the medical field. With more than 250 employees, a 70,000 sq.m. headquarters, three subsidiaries abroad and affiliates worldwide, it is present on the market with three product lines dedicated to the safety of the dental environment and the protection of professionals, dentists and patients.

Monoart, the range of disposable products that teams maximum quality with vibrant colours. **Pro System**, the comprehensive sterilisation system that optimises and tracks the entire process. **Alle**, the disposable line to create a sterile surgical field and prevent infection.

To complete the offering for all-round protection, Euronda has created five complementary lines. **Eurosteril**, rolls and pouches that ensure sterility is maintained over time. **Sanifizer**, products for the cleaning and disinfection of surfaces, accessories and instruments in the dental practice. **Eyewear**, protective glasses and visors for operators and patients, designed and manufactured to guarantee maximum safety. **Studio**, a range of products and accessories to meet all the daily requirements of dentists, assistants and patients. **Stools**, the line of professional stools designed to meet the different requirements of studios.

Driven by a dynamic team, Euronda combines in-depth knowledge of the market with ongoing innovation in materials, processes and technologies to meet the needs of the sector and optimise work phases in full compliance with regulations, with particular attention to the environmental impact of the products and processes.

Surgical sets

Euronda Alle sterile disposable sets include apparel for staff and patients and components for the preparation of the surgical field. They are designed to best meet the requirements of each surgical procedure.

The contents of the sets vary based on the type of procedure and consist of multiple sterile products packaged in order of use. Customers have the option to create a customised set, choosing from a wide range of components as required, or to opt for pre-configured sets. Of these, some are intended to provide staff apparel and designed for operations of different durations, others for protecting equipment and preparing the surgical field.

Traceable

Packaged with a double removable label to ensure maximum security for the dental practice.

Practical

The components are organised in one convenient package, optimising storage and reducing clinic packaging, with a view to environmental sustainability.

Efficient

They eliminate the risk of forgetfulness and errors on the part of the assistant during the setting up of the surgical field, optimising preparation time. They also significantly simplify procurement management.

Customised surgical sets

Sets dedicated to surgical gowning and surgical field preparation, with customisable content to best meet the needs of each surgical procedure.

The introduction of customised sets means that dental practices can ensure their procedures are correct and standardised, which raises the level of protection and the perceived quality of the service provided.

The composition of the sets can vary depending on the type of intervention and the organisation of the practice, with a choice of more than 250 items with which to compose them.

All components in the sets are tested and comply with the European Medical Device Regulation and all applicable international standards.

Classification

Procedural kit

Sterility

Guaranteed up to 59 months from date of manufacture

Packaging

Three possible packagings: blister, medical paper and plastic pouch, pouch with Tyvek insert

Patient Set

A set intended for gowning patients undergoing all types of implantology, periodontal, dental surgery, and maxillofacial procedures.

Protection of dentists and assistants

Gowns and devices for apparel

The gowns are intended to protect both the patient and staff in the operating room from the transfer of microorganisms, body fluids and particulate matter.

When worn properly, they help to keep the surgical field sterile. Comfortable, soft, waterproof and breathable, they provide the utmost comfort during procedures. Some gowns are also available in non-sterile versions to meet the needs of every clinic.

Caps and shoe covers complete the range.

High-performance

Surgical gowns guarantee the adherence to standard EN 13795-1, ensuring robustness, a low release of particles, and preventing the penetration of liquids and pathogenic microorganisms.

Biocompatible

The gowns and caps meet the requirements for clinical applications ensuring the absence of potential adverse reactions.

Traceable

Each sterile gown is packed in a sterile medical blister pack and complete with a double adhesive label to provide maximum traceability.

NWF Spunlace gown

Highly breathable NWF Spunlace gown, combining exceptional comfort with high water repellency. Ideal for longer operations.

The surgical pleat, double lace fastening inside and out, knit cuffs and velcro neck strap guarantee the perfect fit. Complete with two towels.

NWF Spunbond gown

NWF Spunbond gown with knit cuffs, suitable for visitors and patients, but also for healthcare workers engaged in short or outpatient procedures. The porous structure of the fabric and the special surface treatment make it the most breathable in the range.

With its perfect fit, it allows you to move around as you normally would without tearing the fabric. Adjustable NWF belt and ties for fastening around the neck at the back. Available in sterile and non-sterile versions, based on your needs.

NWF Spunlace cap

Cap with elastic back made of NWF Spunlace, a material that combines exceptional comfort with high breathability. The fabric limits the transmission of pathogenic microorganisms while protecting the operator and the patient. Ideal for surgeons performing longer operations.

Equipped with comfortable elastic on the back sections to fit all sizes and comfortably follow the shape of the head.

Prevents the body temperature from increasing thanks to the highly breathable fabric, which is also very water-resistant.

Protection of the patient

Surgical drapes and accessories

When procedures for setting up the surgical field are followed, sterile and disposable drapes are used to create a sterile and safe environment.

Made from high-quality materials and available in various sizes and models, they offer an effective barrier against pathogen migration, reducing the risk of post-operative infections.

Developed with a focus on innovation and the quality that is typical of Made in Italy, they prove to be cutting-edge products that make all the difference in the operating room.

High-performance

They guarantee surgical performance according to EN 13795-1, ensuring robustness, a low release of particles and prevention of the penetration of liquids and pathogenic microorganisms.

Wide range

Available in NWF or cellulose, double-sided with a polyethylene layer, which makes them absorbent and waterproof, and in breathable and water-repellent Spunlace.

Guaranteed

Individually packaged for guaranteed sterility for 59 months from the date of manufacture.

Mayo surgical table drape

Double-sided drape for covering the Mayo table, equipped with a special pocket for better insertion on the table itself.

Folded and packaged so that staff members maintain a clean and sterile environment while handling them.

Surgical drapes with central adhesive opening

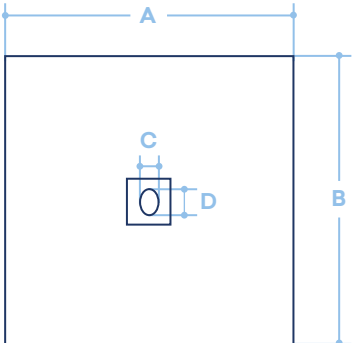

Polyethylene-coupled NWF surgical drapes with a centrally positioned, circular adhesive hole to create a stable and secure sterile field thanks to the practical medical adhesive. Ideal for interventions with medium to high fluid release.

The "no-memory" fabric guarantees high drapability. Folded and packaged so that staff members maintain a clean and sterile environment while handling them.

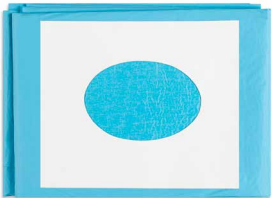

Produced with materials certified for contact with human tissue, ensuring safety and the absence of potential undesirable reactions such as skin reactions and sensitisation.

Surgical drape with off-centre adhesive opening

NWF surgical drape coupled with polyethylene with a circular adhesive hole in an off-centre position that allows the drape to be optimised in size and to create a stable and secure sterile field thanks to the practical medical adhesive. Ideal for interventions with medium to high fluid release.

The "no-memory" fabric guarantees high drapability. Folded and packaged so that staff members maintain a clean and sterile environment while handling them.

Manufactured from materials certified for contact with human tissue, ensuring safety and the absence of potential undesirable reactions such as skin reactions and sensitisation.

Drape with non-adhesive U-shaped cut-out and adhesive point

Polyethylene-coupled NWF surgical drape with U-shaped cut-out and adhesive point to facilitate positioning on the lower lip or chin, creating an effective sterile field. Industry experts maintain that the 115-cm length is perfect for covering patients. Ideal for interventions with medium to high fluid release.

The "no-memory" fabric guarantees high drapability. Folded and packaged so that staff members maintain a clean and sterile environment while handling them.

Manufactured from materials certified for contact with human tissue, ensuring safety and the absence of potential undesirable reactions such as skin reactions and sensitisation.

NWF Spunlace surgical drapes

Spunlace surgical drapes, specially designed for long and complex surgical operations with medium to high fluid release. Spunlace NWF guarantees exceptional comfort, high breathability, water repellency and drapability.

The highly opaque fabric also minimises the risk of distractions caused by reflective glares. Folded and packaged so that staff members maintain a clean and sterile environment while handling them.

Produced with materials certified for contact with human tissue, ensuring safety and the absence of potential undesirable reactions such as skin reactions and sensitisation.

NWF Spunlace surgical antipanic drape

NWF Spunlace surgical drape with triangular opening and Velcro tubing holder, designed for long and complex surgical operations with medium to high fluid release.

Equipped with a protective window made of transparent material to protect the patient's eyes from accidental splashes or injuries while still allowing eye contact. Folded and packaged so that staff members maintain a clean and sterile environment while handling them.

Manufactured from materials certified for contact with human tissue, ensuring safety and the absence of potential undesirable reactions such as skin reactions and sensitisation.

Protection of the clinic

These sterile products are the ideal solution for protecting small and medium-sized surfaces and equipment near the surgical field area.

Made from quality plastic materials, they provide an effective barrier against contamination and help keep the surgical room perfectly sterile.

Universal

These make it possible to protect all equipment and small surfaces in the surgical environment.

Practical

Each product is easy to apply, enabling you to set up your surgical field in a quicker and more precise manner.

Safe

Made of certified medical grade materials, free of toxic substances. They guarantee maximum safety during their use, making them ideal even in the most demanding surgical environments, where preserving sterility and minimising the risk of contamination is essential.

All-purpose bag for radiographic systems

This all-purpose bag is sterile, see-through and makes it possible to protect radiographic, photographic and microscopic systems, leaving the surgical field totally sterile, without compromising the radiographic system.

Adhesive film

Adhesive polyethylene films intended for the protection of surfaces that are difficult to sterilise or clean but exposed to contamination (control panels, handles, switches, etc.), preventing pathogenic micro-organisms from settling and subsequently being released into the air causing infection.

They allow the creation of a safe sterile field, leaving no residue on protected surfaces.

Surgical brush

Complete set of sponge, brush and nail cleaner for surgical hand washing. Available in two versions:

- Dry version: can be used with any type of antiseptic soap. Shelf life of five years from the date of manufacture.
- Chlorhexidine version (20 ml): composed by a broad-spectrum biocidal detergent/disinfectant that is released gradually after contact with the skin. Shelf life of three years from the manufacturing date.

It is bio-compatible and meets the requirements for clinical applications ensuring the absence of potential adverse reactions.

Classification

Medical Device Class IIa

Material

Dry version: polyethylene brush, polyurethane sponge, polypropylene nail cleaner.

Chlorhexidine version: impregnated with 4% CHG (Chlorhexidine Gluconate). Free of latex and phthalates.

Sterility

Dry version: guaranteed for 5 years from the sterilization date

Packaging

Pack of 40 pieces
Box of 6 packs

Chlorhexidine version: 270751

Surgery devices

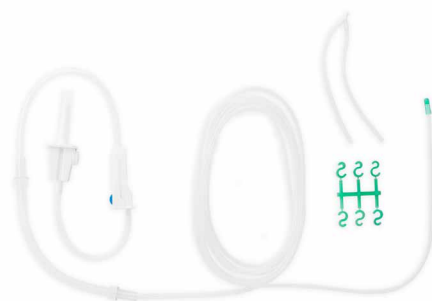

Irrigation systems and suction systems

Surgical devices play a key role in ensuring the success of surgical procedures by helping to create a safe, sterile and efficient environment. These products combine advanced technologies and high-quality materials to deliver reliable performance at every stage.

Suction units and cannulas ensure maximum hygiene and effective fluid management in all surgical operations where precise suction is required without compromising visibility of the surgical field.

The saline line and irrigation lines play a crucial role in maintaining a clean and sterile surgical field and in cooling the area during surgery.

Mechanical irrigation lines

Mechanical irrigation lines available in different variants, they are designed to be installed on a particular physiodispenser and deliver the correct amount of cooling liquid. Equipped with a perforator with an "open and close" cap, air filter and soft tip to facilitate insertion.

The high quality of the Euronda Alle irrigation lines is ensured by selected latex- and phthalate-free plastic materials and components, and scrupulous manufacturing processes.

Individually packed in sterile blister packs with labels for maximum traceability.

Classification

Medical Device Class IIa, CE0051

Material

Silicone, PVC and ABS free from latex and phthalates

Sterility

Guaranteed for 59 months from date of manufacture

Packaging

Pack of 10 units

Manual irrigation line

A manual irrigation system with a button-based flow regulator that enables assistants to keep the implant site clean and cool. The system is also suitable for irrigation during the final screwing of the implant using a dental torque wrench and for periodontal surgery, where it is essential to keep the surgical site clean and irrigated and the tissues hydrated.

The exceptional quality is ensured thanks to high-quality plastic materials and components, free from phthalates, and the scrupulous manufacturing processes.

Individually packed in sterile blister packs with labels for maximum traceability.

Saline solution

Sterile isotonic solution suitable for irrigating surgical areas while cooling rotary instruments during operations or oscillating instruments during piezoelectric surgery. Specially designed not to alter extracellular osmotic balance during procedures. After surgery, it can be used to remove blood and tissue fragments, and to wash and irrigate wounds.

Used with a peristaltic pump, it adapts to all physiodispensers.

It has been tested for safe contact with tissue, bone and dentine for up to 24 hours.

Classification

Medical Device Class IIa

Composition

Pharmaceutical grade sodium chloride (0.9%) and water for injectable preparations

Formats

250 ml, 500 ml

Sterility

Guaranteed for 3 years from the sterilization date

Packaging

Euronda[®]
Eyewear

Euronda Eyewear

Protection at first sight

Euronda Eyewear offers a wide range of protective glasses and visors for operators and patients, designed and manufactured to ensure maximum safety in every situation while guaranteeing comfort and an appealing design.

Different models for every occasion: can be used over corrective glasses, in versions with orange or smoked lenses, with anti-fog and scratch-resistant treatment to protect against impact, UV400 and blue light (up to 525 nm).

Classification

Personal Protective Equipment Category 2, compliant with EU Regulation 2016/425

Regulations

Compliant with ISO 16321: Contemporary, Cube, Cube Orange, FitUp, Clear, Light Orange, Zero, Cube Smoke

Compliant with EN 166 CE: Evolution, Evolution Orange, Baby Orange, Small Visor, Operator Visor

Variants

Available in different models and colours, with clear, orange, or smoked lenses

Packaging

Individual pack
Box of 10 pieces (except Contemporary sold individually)

Treatments

Anti-fog

When used in combination with the surgical mask, lenses may fog up, impairing visibility. Euronda Eyewear protective glasses offer different types of treatment to prevent the formation of condensation:

- **Basic:** meets requirements of the current legislation, preventing condensation formation for 8 seconds.
- **Plus:** guarantees anti-fogging properties five times higher than the requirements of current legislation, preventing the formation of condensation for 40 seconds.
- **Ultra:** made on the inside of the lens, it prevents the formation of condensation over 40 seconds, guaranteeing outstanding anti-fog properties.

Anti-scratch

Scratches can compromise lens transparency and thus visibility, exposing the operator to various risks. The lenses of Euronda Eyewear protective glasses offer different levels of protection against scratches and abrasions:

- **Basic:** meets requirements of the current legislation, which requires testing the scratch resistance by dropping quartz sand on the lens from a certain height and then testing the reduced luminance factor.
- **Plus:** hardens the lens surface for excellent scratch resistance and transparency in all conditions. The reduced luminance factor is 2 Cd / Mq x lux.
- **Ultra:** guarantees a longer lifespan, improved visibility even in critical conditions, and performs significantly better than standard anti-scratch treatments on the market. The reduced luminance factor is 1.2 Cd / Mq x lux.

Frame technologies

Euronda Eyewear protective glasses offer maximum comfort and ergonomics through attention to detail, careful design, innovative use of materials and the following technologies:

- Adjustable nose pad;
- Integrated side protectors;
- Tilting movement of the temples for a perfect fit and stability;
- Adjustable tilt and length of the temples for a perfect fit.

| | Anti-fog | Anti-scratch | Technologies | Weight |
|---------------------|----------|--------------|------------------------------------------------------------------------------------------------|--------|
| Contemporary | Plus | Plus | Integrated side protectors | 25 g |
| Cube | Plus | Plus | Integrated side protectors Tilting movement Length-adjustable arms | 37 g |
| Evolution | Ultra | Ultra | Adjustable nose pad Tilting movement Length-adjustable arms | 37 g |
| FitUp | Plus | Plus | Adjustable nose pad Adjustable length and tilt of arms | 25 g |
| Clear | Basic | Basic | Integrated side protectors Adjustable length and tilt of arms (only model with orange lens) | 30 g |

Contemporary

Lightweight yet incredibly robust protective glasses with an elegant and sophisticated design, ideal for doctors and assistants. The transparent lenses have undergone an anti-fog treatment that makes them twice as effective against condensation, and an anti-scratch treatment that provides five times the standard abrasion resistance.

With a glossy total black frame, which allows the easy replacement of the standard lenses with corrective lenses if necessary. Transparent side guards guarantee complete safety and maximum visibility.

Euronda[®]
Studio

Euronda Studio

Complete your workspace

Euronda Studio offers a wide selection of products and accessories to protect the clinic, operators and patients, while enhancing and complementing Euronda's existing range.

Developed to meet various everyday needs, the products in the Studio line deliver the unmistakable quality of the Euronda brand.

EM45 SurgiFlexo Tip

Flexible sterile aspirator tip suitable for surgical aspiration, especially for apicoectomies, gingival grafts and implantology operations with limited operating space. Ideal in hard-to-reach areas, such as in wisdom tooth operations.

The possibility to flex the tube and unscrew the tip allows its adaptation to different aspiration needs during the various stages of the operation.

Each aspirator tip is packed in a sterile medical blister with a double adhesive label to provide maximum traceability. Each pack includes two adapters suitable to fit a connection with a diameter of 6.5 mm with an outlet with a diameter of 11 mm and 16 mm.

Classification

Medical Device Class IIa

Material

PVC, PP

Colour

Blue

Dimensions

Without tip: 15.5 cm
With tip: 18 cm

Sterility

Guaranteed 5 years from date of sterilisation

Packaging

Pack of 20 sterile tips and 2 adapters

Safe

The tube and tip are biocompatible and guarantee patient safety. In addition, the tip is designed to be gentle on the tissue.

Versatile

The unscrewing of the tip provides safety and versatility, prevents accidental removal and allows the suction opening to be varied from 2.6 mm to 4.8 mm, offering increased performance.

Precise

The built-in wire in the transparent tube ensures the right degree of rigidity and maintenance of the bending angle. The light blue colouring of the tip provides maximum contrast for better precision.

EM40

aspirator tip

Surgical aspirator tip ideal for hard-to-reach areas due to the thin, elongated end.

Available accessories

- Aspirator tip adaptor EM40 autoclavable to 134°C. Can be used to adapt from a connection with a diameter of 1.6 cm to an outlet with a diameter of 1.1 cm.

Classification

Medical Device Class IIa, CE0051

Colour

Grey

Dimensions

1.1 cm x 20 cm (Øxw)

Packaging

Pack of 10 pieces

Eco-friendly

EM40 aspirator tip is autoclavable up to 100 times at 134°C.

Safe

Medical Device Class IIa, manufactured in Italy from certified plastic materials.

Effective

The linear shape ensures quieter operation while improving hygiene.

Decontamination mat

Decontamination mat in low-density polythene with 30 numbered and branded adhesive sheets, to prevent the spread of bacteria in the surgery.

Thanks to the special formula of the bactericidal gelatine present on the upper surface, it removes and deactivates the bacteria present on the soles of shoes.

Classification

Medical Device Class I

Colour

Blue

Dimensions

45 x 115 cm

Packaging

Pack of 4 pieces, each one with 30 removable adhesive sheets

Practical

The numbered sheets optimize the handling of the decontamination mat by assisting the operator in changing the different layers.

Hygienic

An additional layer of protection that increases the level of safety in operating theatres and surgeries, supporting the creation and maintenance of the sterile field.

Functional

Smooth surface without imperfections, for maximum effectiveness in removing dirt. Fixing band at the bottom for perfect grip to the floor.

Barrier film

Disposable film for the protection of areas and surfaces, especially those difficult to reach, clean or disinfect. Reduces the risk of cross-contamination caused by aerosols and sprays.

Thanks to the lightweight adhesive, it adheres easily to all surfaces without leaving residue, while the non-adhesive border on both sides makes placement and removal quick and easy.

Colour

Transparent blue

Dimensions

Pack: 18 x 12 x 16.5 cm
(wxdxh)

Sheet: 10 x 15 cm

Packaging

Single pack containing one roll of 1200 tear-off sheets with dispenser

Safe

An all-purpose infection-control barrier designed to isolate all instruments and surfaces quickly and easily.

Protective

Quick to apply and remove, it leaves no residue and is suitable for use on all surfaces and objects.

Practical

Pack contains a roll with 1200 tear-off sheets and is designed to ensure the highest level of hygiene and ease of use.

Turbine cover

Disposable sleeve in clear polyethylene film, which helps prevent the risk of cross-contamination.

Available in two different sizes:

- 4.5 cm diameter, ideal for turbine cords, suction tubes and handpieces;
- 5.5 cm diameter for micromotor cords, air/water syringes and connecting tubes.

Colour

Transparent

Dimensions

Pack: 11 x 6 x 11 cm
(wxdxh)

Sheet: 4.5 x 45 cm (Øxl) or
5.5 x 45 cm (Øxl)

Packaging

Single pack containing
one roll of 250 tear-off
sheets

Functional

Guarantees and simplifies the protection of devices and components used in close contact with the patient.

Practical

Pack containing one roll of 250 tear-off sheets and a dispenser, designed to ensure maximum hygiene and ease of use.

Tailor-made

Available in two sizes with a diameter of 4.5 cm and 5.5 cm, designed to optimally protect various suction systems and micromotors.

Tissues

Soft and durable tissues made from pure double-ply cellulose (total grammage 31 g/m²) from FSC-certified forests managed according to strict environmental, social and economic standards.

Colour

White

Dimensions

Pack: 23 x 12 x 5 cm
(wxdxh)
Towel: 20 x 21 cm

Packaging

Pack of 100 tissues
Box of 40 packs

Practical

Thanks to the practical packaging, the tissues are always at hand and easy to take out of the box.

Resilient

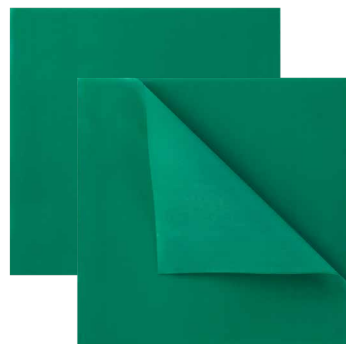

Made of pure, double-ply cellulose fibre wadding for excellent strength and absorbency.

Delicate

Euronada Studio tissues are soft and have a pleasant feel on the skin.

Rubber dam

Medium-thickness latex rubber dental dam (0.18 mm/0.23 mm), optimized for better tear resistance.

Thanks to the excellent antibacterial properties of latex, it optimizes infection control and cleanliness in the working area. Ideal for endodontic and conservative procedures, it isolates the affected area and limits aerosol formation.

Classification

Medical Device Class I

Colour

Green

Dimensions

15 x 15 cm

Packaging

Pack of 36 pieces

Insulating

It creates an effective barrier between the area to be treated and the rest of the mouth, limiting contamination by bacteria in the oral cavity.

Effective

Soft and pliable, it facilitates the creation of a dry and stable intervention area, supporting work and improving visibility.

Functional

Used in conjunction with double surgical suction, it reduces aerosol formation, which is responsible for the transmission of viruses and bacteria.

Cotton rolls

Pure long-fibre cotton rolls with high absorbency (five times their weight). Euronda Studio cotton rolls are bacteriologically safe, having a bioburden level of less than 140 CFU/pc.

Available accessories

- Practical dispenser for cotton rolls, available in white and light blue.

Classification

Medical Device Class I

Dimensions

0.8 cm x 3.7 cm (Øxw)

1 cm x 3.7 cm (Øxw)

1 cm x 3.7 cm:

Pack of 300 g

Box of 60 packs

1.2 cm x 3.7 cm:

Pack of 300 g

Box of 30 packs

Functional

Absorbent, durable and comfortable, they have excellent flexibility to adapt to the area in which they are placed maintaining the position and the shape when inserted.

Versatile

Available in three different sizes to suit the patient and different types of medical and surgical procedures.

Eco-friendly

Euronda Studio cotton rolls are bleached with hydrogen peroxide without the use of chlorine, paying special attention to the environment and sustainability.

Alginate mixing bowls

Bowls for mixing dental material before using on the patient.

Available in different formats.

Colour

Green

Dimensions

Small: 11 x 7.5 cm (Øxh)

Medium: 12.5 x 9 cm (Øxh)

Large: 14 x 11.2 cm (Øxh)

Maxi: 16.5 x 15.4 cm (Øxh)

Packaging

Single pack

Functional

Non-toxic and latex-free PVC cups, ideal for mixing plaster and alginates.

Versatile

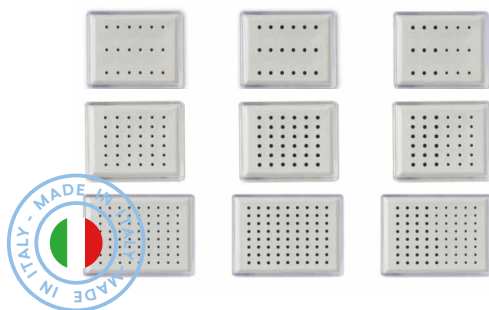

Available in four different formats, they adapt to the needs of every dental practice.

Practical

The smooth surface makes cleaning the cups extremely easy and straightforward. The ergonomic shape makes it easy to use.

Bur blocks

Bur blocks for dentists with perforated base and transparent lid, suitable for storing diamond burs, contrangle and handpiece. Made of high-quality materials, they are durable and long-lasting to support the daily work of the dental practice for a long time.

The base is autoclavable to a maximum of 130°C. Available in different formats, 18, 36, 72 bur blocks with FG, HS or mixed holes, to meet all different requirements.

Colour

Light grey

Dimensions

Bur blocks for: 18FG, 18RA, 18 FG RA mixed, 36FG, 36RA, 36 FG RA mixed, 72FG, 72RA and 72 FG RA mixed

Spray ice

Hypothermizing spray ice consisting of a mixture of hydrocarbons in a 200 cc canister. Easy to use thanks to the precision nozzle. Ideal for cooling impression material such as hydrocolloids and glass plates. Non-toxic product with a delicate mint fragrance.

Shelf life

3 years

Packaging

Pack of 12 pieces

X-ray aprons

X-ray aprons with collar. Designed for complete protection of the neck, throat, chest, shoulders and genital area. The aprons are leaded and lined with easily cleanable vinyl. The Velcro fastener makes it quick and easy to use.

Available in three different sizes:

- for operator (length 94 cm);
- for adult (length 71 cm);
- for child (length 56 cm).

Classification

Personal Protective Equipment Category 3, compliant with EU Regulation 2016/425

Colour

Beige

Dimensions and weight

For operator: 61 x 94 cm (wxl) - 3.6 Kg

For adult: 58.5 x 71 cm (wxl) - 2.9 Kg

For child: 48.5 x 56 cm (wxl) - 2.2 Kg

Lead protection

0.35 mm
